**PHARMACY INFORMATION (Prescriber to identify the pharmacy that is to dispense the medication):**
 Deliver to: Patient's Home Physician's Office Patient's Preferred Pharmacy Name:

NPI#:

Pharmacy Phone #:

Pharmacy Fax #:

 I acknowledge that the patient agrees with the pharmacy chosen for delivery of this medication.

**Complete all sections that apply to the beneficiary and this request.
Check all that apply and submit documentation for each item.**

INITIAL REQUESTS**Drug****1. Requested drug is NON-PREFERRED:**

- Tried and failed or has a contraindication or intolerance to the preferred drugs in this class approved or medically accepted for the beneficiary's condition.
List preferred medications tried: _____

2. Requested drug is OTEZLA (apremilast) or SILIQ (brodalumab):

- Was evaluated for history of prior suicide attempt, bipolar disorder, or major depressive disorder

3. Requested drug is an oral JAK inhibitor (eg, Olumiant [baricitinib], Rinvoq [upadacitinib], Xeljanz [tofacitinib]):

- Tried and failed at least one TNF blocker or another biologic as recommended in the JAK inhibitor's package labeling
 Has a contraindication or an intolerance to TNF blockers or other biologics as recommended in the JAK inhibitor's package labeling

Diagnosis**1. ALL diagnoses:**

- Screened for hepatitis B virus infection (surface antigen, surface antibody, and core antibody)
 Screened for tuberculosis

2. Adult-onset Still's disease:

- Has predominantly systemic disease:
 Has steroid-dependent disease with intent to decrease or discontinue dose of steroid with use of Cytokine and CAM Antagonist
 Tried and failed or has a contraindication or an intolerance to systemic glucocorticoids
 Has predominantly joint disease:
 Tried and failed or has a contraindication or an intolerance to conventional DMARDs (eg, MTX)

3. Alopecia areata:

- Has alopecia universalis
 Has >50% scalp involvement or alopecia totalis
 Has alopecia that causes significant disability or impaired physical, mental, or psychosocial functioning
 Has a current episode of alopecia areata that has lasted at least 6 months

4. Ankylosing spondylitis & non-radiographic axial spondyloarthritis:

- Tried and failed a 2-week trial of or has a contraindication or an intolerance to 2 different oral NSAIDs

5. Behçet's syndrome:

- Has a diagnosis of Behçet's syndrome according to current consensus guidelines
 Has recurrent oral ulcers associated with Behçet's syndrome
 Tried and failed or has a contraindication or an intolerance to a topical corticosteroid (eg, triamcinolone dental paste)
 Tried and failed a 3-month trial of or has a contraindication or an intolerance to colchicine at maximally tolerated doses

6. Crohn's disease:

- Has moderate-to-severe disease
 Has disease that is associated with high-risk or poor prognostic features
 Tried and failed to achieve remission with or has a contraindication or an intolerance to an induction course of corticosteroids
 Tried and failed to maintain remission with or has a contraindication or an intolerance to conventional immunomodulators (e.g., AZA, 6-MP, MTX)

7. Familial Mediterranean fever:

- Tried and failed a 3-month trial of or has a contraindication or an intolerance to colchicine at maximally tolerated doses

8. Gout flare:

- Tried and failed or has a contraindication or an intolerance to NSAIDs at maximally tolerated doses
 Tried and failed or has a contraindication or an intolerance to colchicine at maximally tolerated doses
 Tried and failed or has a contraindication or an intolerance to corticosteroids
 Has a medical reason why repeated courses of corticosteroids are not appropriate

9. Giant cell arteritis:

- Tried and failed or has a contraindication or an intolerance to systemic glucocorticoids
 Is at high risk for glucocorticoid-related complications
 Has steroid-dependent disease with intent to decrease or discontinue dose of steroid with use of Cytokine and CAM Antagonist

10. Hidradenitis suppurativa (HS):

- Has Hurley stage II or stage III disease
 Is a candidate for or has a history of surgical intervention for HS
 Tried and failed a 3-month trial of or has a contraindication or an intolerance to topical clindamycin
 Tried and failed or has a contraindication or an intolerance to systemic antibiotics (e.g., doxycycline, minocycline, tetracycline, clindamycin)

**INITIAL REQUESTS (continued)****11. Juvenile idiopathic arthritis:**

- Has systemic disease with active systemic features
- Has disease associated with any of the following:
 - Positive anti-CCP antibodies
 - Positive rheumatoid factor
 - Presence of joint damage
 - At high risk of disabling joint damage
 - High disease activity
 - Involvement of high-risk joints (cervical spine, hip, wrist)
- Tried and failed a 3-month trial of or has a contraindication or an intolerance to conventional DMARDs (e.g., MTX)
- Has active sacroiliitis and/or enthesitis:
 - Tried and failed a 2-week trial of or has a contraindication or an intolerance to oral NSAIDs

12. Plaque psoriasis:

- Has a BSA of $\geq 3\%$ that is affected
- Has involvement of critical areas of the body (eg, skin folds, face, genitals)
- Has psoriasis that causes significant disability or impaired physical, mental, or psychosocial functioning
- Has moderate-to-severe nail disease
- Tried and failed a 4-week trial of or has a contraindication or an intolerance to topical corticosteroids
- Tried and failed an 8-week trial of or has a contraindication or an intolerance to non-steroid topical medications (e.g., anthralin, calcineurin inhibitor, tazarotene, etc)

13. Polymyalgia rheumatica:

- Tried and failed or has a contraindication or an intolerance to systemic glucocorticoids
- Has steroid-dependent disease with intent to decrease or discontinue dose of steroid with use of Cytokine and CAM Antagonist

14. Psoriatic arthritis:

- Tried and failed an 8-week trial of or has a contraindication or an intolerance to conventional DMARDs (e.g., AZA, leflunomide, MTX, SSZ)
- Has predominantly axial disease, dactylitis, and/or enthesitis
- Has severe disease
- Has comorbid moderate-to-severe nail psoriasis
- Has comorbid active inflammatory bowel disease

15. Rheumatoid arthritis:

- Tried and failed a 3-month trial of or has a contraindication or an intolerance to conventional DMARDs (e.g., AZA, leflunomide, MTX, etc.)

16. Sarcoidosis:

- Tried and failed or has a contraindication or an intolerance to systemic glucocorticoids
- Has steroid-dependent disease
- Tried and failed or has a contraindication or an intolerance to a conventional DMARD (e.g., AZA, leflunomide, MTX, mycophenolate)

17. Ulcerative colitis:

- Has moderate-to-severe disease
- Has disease associated with multiple poor prognostic factors
- Tried and failed to achieve remission with or has a contraindication or an intolerance to an induction course of corticosteroids
- Tried and failed to maintain remission with or has a contraindication or an intolerance to conventional immunomodulators (e.g., AZA, cyclosporine, 6-MP, MTX)

18. Uveitis (non-infectious):

- Has comorbid juvenile idiopathic arthritis
- Has comorbid Behçet's syndrome
- Has steroid-dependent disease with intent to decrease or discontinue dose of steroid with use of Cytokine and CAM Antagonist
- Tried and failed or has a contraindication or an intolerance to systemic, topical, intraocular, or periocular corticosteroids
- Tried and failed or has a contraindication or an intolerance to conventional systemic immunosuppressives (e.g., AZA, MTX, MMF, etc)

19. Spevigo (spesolimab) for treatment of generalized pustular psoriasis (GPP) flares:

- Has received a single dose of Spevigo (spesolimab) for current GPP flare:
 - Continues to experience moderate to severe GPP flare symptoms since the previous dose
- Has not received a dose of Spevigo (spesolimab) for current GPP flare:
 - Is experiencing a moderate to severe GPP flare that warrants rapid stabilization or improvement

20. Other diagnosis:

- List other treatments tried (including start/stop dates, dose, outcomes):

RENEWAL REQUESTS

- Experienced an improvement in disease severity or level of functioning since starting therapy with the requested medication
- Is prescribed an increased dose or more frequent administration of the requested medication that is supported by peer-reviewed medical literature or national treatment guidelines
- Requested drug is OTEZLA (apremilast) or SILIQ (brodalumab):
 - Was recently reevaluated for behavioral and mood changes
